

VIVEK CHINMAY DHANWADA

Carlingford, NSW | +61 492 911 031 | vivekchinmay@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Personal Summary

Data Analyst with experience solving operational and commercial problems through analysis and reporting. Microsoft Certified: Power BI Data Analyst Associate, with dashboards adopted into standing reporting workflows and analysis that shaped business planning and resourcing decisions.

Skills

- **Programming & Scripting:** Python, R
- **Database and Querying:** SQL, PostgreSQL
- **Analytics & BI:** Power BI, DAX, Power Query, Tableau, Excel, Google Analytics 4
- **Tools & Integration:** GitHub, REST APIs

Experience

Green The Chain

Business Analytics & Development Intern

Sydney, Australia · Mar 2025 - Oct 2025

- Built an automated GA4 dashboard in Google Sheets with week-on-week comparisons across traffic KPIs by channel; adopted by the founding team as their primary performance monitoring tool.
- Implemented UTM tracking across LinkedIn, Slack, and email campaigns, closing a source-tracking gap; website traffic doubled week-on-week with Slack identified as the highest-performing channel.
- Compiled a prioritised tracker of 50+ ESG suppliers across company aggregators and sustainability portals, becoming the team's primary outreach tool and reducing manual research time.

Climate Action Foundation Ltd

Data Management Volunteer

Sydney, Australia · Jan 2025 - Mar 2025

- Managed backend event data across Notion and Google Sheets for a 12,500+ participant sustainability event, cleaning and validating 500+ session records to ensure accuracy and completeness.
- Analysed session records to identify redundancies and coverage gaps across the event programme, directly informing schedule restructuring decisions.

AIIESEC

National Business Development Consultant

Hyderabad, India · Feb 2021 - Jan 2022

- Reviewed bi-weekly performance data from 6 Business Development Heads, consolidating multi-city pipeline reporting and presenting recommendations to national leadership that realigned local activity with national targets and restructured BD allocation across the network.
- Monitored national pipeline and performance trends across multiple cities, identifying regional variances and translating analytical findings into planning recommendations that supported national planning and target achievement.

Business Development Manager → Head of Business Development

Hyderabad, India · Jan 2019 - Jan 2021

- Built CRM tracking systems and dashboards monitoring revenue, ticket sales, and sponsorship performance for the local BD department, leading the team to a top 5 ranking among 30 BD departments nationally and a BD Excellence Award nomination.
- Analysed post-event attendance and engagement data for 1,000+ participant events, identifying virtual platforms and education as highest-performing segments and refocusing outreach strategy for subsequent events.

Certifications

- Microsoft Certified: Power BI Data Analyst Associate: Microsoft · June 2026

Projects

Spain at Euro 2024 - Tactical Analysis [View Project](#)

Python, Tableau | StatsBomb Open Data

Portfolio Project

- Spain ranked #1 in goals, pressures, and ball recoveries across all 24 Euro 2024 teams, from a ranking system built on 3,000+ events per match extracted and processed across 51 match files via StatsBomb's Python API.
- Spain's win was system-based rather than striker-led: goals came from 10 different scorers, with possession driven by defenders and midfielders.

NSW Opal Card Tap-On/Tap-Off Analysis [View Project](#)

PostgreSQL, Tableau | Transport for NSW Open Data

Portfolio Project

- Morning commuter demand collapsed 80% and the weekday/weekend ratio compressed from 5.6x to 2.6x between standard and holiday weeks, from 398,019 records modelled in PostgreSQL using CTEs and window functions.
- Ferry was the only mode to grow (+66%) while train and bus fell sharply, signalling a shift from commuter to leisure travel.
- Identified a structural data quality issue across 22,425 rows (~13% missing tap direction values), documenting the methodological decision to retain affected rows for volume analysis while excluding them from directional analysis.

Australian National Electricity Market - Emissions & Bidding Analysis [View Project](#)

Python | Macquarie University

- NSW's carbon intensity fell 21.7% against a 7.7% national average, evidence of faster decarbonisation than the national grid, from 5-minute interval NEM emissions data processed across 2019 and 2025 dispatch periods via the CSIRO API in Python.
- Evening emissions fell more sharply than daytime between 2019 and 2025, evidence renewable energy and battery storage are now operating beyond peak solar hours.
- Fossil bid IQR widened from \$85/MWh to \$210/MWh, quantifying generators' shift toward flexible peaking capacity as renewable penetration increases, modelled from 2019 and 2025 AEMO dispatch bidding behaviour.

Australian Population & Migration Trends Analysis [View Project](#)

Power BI, Excel | Macquarie University

- The 50-74 age cohort emerged as the fastest-growing population group, a structural ageing trend with direct implications for aged care and workforce planning, identified across 20 years of ABS census data in three interactive Power BI dashboards.
- Nepal was the fastest-growing migrant group with a 2,330% increase from 2001-2016, a pattern invisible in national averages that directly informs multicultural service planning for emerging communities.

Education

Macquarie University

Jul 2023 - Jul 2025

Master of Business Analytics

Sydney, Australia

- **Achievements:** Capstone project awarded Distinction, analysing Australian National Electricity Market data to identify emissions trends, generator bidding behaviour, and pricing insights across a 1.6M+ row dataset.
- **Coursework:** WAM: 70.13, Data Visualisation, Statistical Analysis, Python Programming, Power BI, SQL, Tableau, R Programming, Machine Learning, Project Management

Jawaharlal Nehru Technological University Hyderabad

Jul 2018 - Jul 2022

Bachelor of Technology, Mechatronics Engineering

Hyderabad, India
